SUMMARY

Data engineer with 3+ years building Microsoft-scale ETL, SQL models, and reporting infrastructure. I ship reliable pipelines, semantic layers, and data-quality loops for high-stakes decisions.

EXPERIENCE

Data Analyst May 2025 – March 2026
University of Virginia Charlottesville, VA

- Delivered analytics pipelines end-to-end: requirements, data modeling, Tableau dashboards, and handoff.
- Reduced Tableau load times 20% through telemetry-driven monitoring and optimization.

Software Engineer — Data & Analytics July 2021 – July 2024
Microsoft Redmond, WA

- Designed SQL and MDAX ETL pipelines processing hundreds of petabytes for financial reporting.
- Led SSAS Tabular migration with 200x faster filtering and 300% processing improvement.
- Automated incident generation and pipeline monitoring, reducing on-call load.

Software Engineering Intern Summers 2017 & 2018
Microsoft Redmond, WA

PROJECTS

Indigo Circuit May 2026 — ongoing

Production Web App — indigocircuit.app

- Built Python ingestion and dbt/DuckDB marts for nightly player, archetype, and matchup analytics.
- Implemented Glicko-2 ratings and Bayesian win-rate estimates with 90% credible intervals.
- Protected nightly rebuilds with fail-closed validation before serving production dashboards.

Social Vulnerability & Health Outcomes in America May 2026 — ongoing

Independent Research — Phase 1 of 4 published

- Joined CDC datasets across 73,000+ census tracts covering 313M people.
- Published reproducible analysis with explicit methods, limitations, and a phased research agenda.

EDUCATION

B.S. Statistics and Data Science

Virginia Tech · 2015 – 2021

TECHNICAL SKILLS

Languages

Python, SQL, R, Java, C, HTML, CSS

Data Engineering

ETL/ELT, SQL modeling, dbt Core, DuckDB, Azure Data Factory, Azure Data Lake, Spark, Databricks, SSAS Tabular

Analytics & Visualization

Tableau, Power BI, Pandas, NumPy, Matplotlib, dashboards, metrics development

Infrastructure & Tools

Git, Azure cloud suite, REST APIs, performance tuning, observability, data quality

Data Science

Bayesian modeling, regression, correlation analysis, experimental design
